Addition: Open Number Line

43 + 32 (30+2)

| +10 | +10 | +10 | +2 | =32 |

43   53   63   73   75
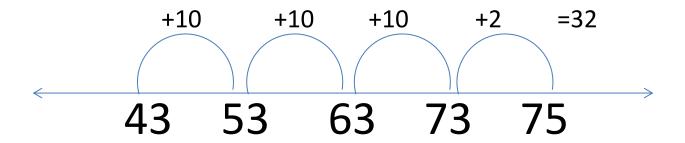

1. Start with the big number.
2. **Decompose** the smaller number to determine jumps to take.
3. Use **jumping by +10** as a strategy to work towards the sum.
    They must know how to add ten to any number.
4. When you can no longer jump by tens, **jump the remaining amount.**
5. **Make sure the jumps add up to the smaller number**.
6. Determine the sum by finding the final number that you landed on.
7. Write the number sentence when you have found the sum. **_Example: 43+32=75_**
