

La COSTA Meadows Elementary SCHOOL

CELEBRATING EFFORT * CHALLENGING THE WHOLE CHILD * BUILDING COMMUNITY

PLEASE READ CAREFULLY BEFORE COMPLETING.

At La Costa Meadows Elementary School we are proud of our outstanding teaching staff. Teams work collaboratively to plan instruction based on the California State Standards and curriculum content is consistent across all grade levels. We place students in classrooms based on a Schoolwide Cluster Grouping Model. All students are **purposefully** placed into classrooms, and the research with this method shows benefits to all students including:

- Challenging gifted students on a consistent basis
- Creating learning and leadership opportunities for all students
- Improving student achievement and raising expectations for all students

The need to effectively balance classes makes individual teacher requests impossible. Our process includes analyzing your child's skills and placing them in a class to maximize their learning.

If you have input that should be considered regarding your child's learning environment, you may provide information to administration using the "Special Considerations" section below. We will consider your child's needs and place them in what we believe is the best environment. Please note that forms with names of teachers will not be reviewed, as we will **NOT** consider specific teacher requests.

Student Name _____

Grade for 2020-2021 _____
